

Native tapioca starch, made in Thailand for buyers worldwide

Food-grade and industrial-grade native (unmodified) tapioca (cassava) starch, manufactured under FSSC 22000 with full value-chain control from cassava sourcing to export.

TQ Industry Starch is a family-owned native tapioca starch manufacturer in Sa Kaeo, Thailand. Building on a starch and flour trading heritage that dates to 1979 (sister company First Starch International), the family integrated vertically by founding its own factory in 2012, controlling fresh cassava sourcing, manufacturing, quality control, packaging, and worldwide distribution. Our differentiators are traceability, fast response to customer specifications, and supply reliability through market volatility.
